Hélène ROCHE, Ethologist, Msc

Hélène Roche is an Ethologist, author of several books on horse ethology. (www.heleneroche.fr)

Medical training : the keys for efficient veterinary interactions with horses

The objectives of this workshop are to :

- *Describe common manipulations that create stress and anxiety in equines, which can lead to safety problems for the animal and the operator.*
- *Be familiar with learning theories and apply them to medical procedures in equines*
- *Learn to divide up the steps necessary to perform an intervention (care, examination...)*
- *Adapt to the equine and its environment*
